

**DATE: December 14, 2015**

In December 2015, SRI Quality System Registrar conducted a surveillance audit at Crucible Industries LLC to the ISO 9001:2008 standard. The review included an examination of our manufacturing and quality systems.

We are pleased to announce that there were no non-conformances. Crucible is due to re-certify at the end of 2016.

This once again demonstrates the commitment to quality and to continual improvement by Crucible's employees.
